

# Morning Star Paper Folding

## Folding the Base

1. Take five triangles and fold the two preparation folds. Unfold.

2. Fold the (P) edges to the centre fold-line. Now turn the sheet over.

3. Fold as shown. Glue. Turn the sheet back over.

4. Fold back both flaps as far as possible. Glue the two concealed marked points. You can finish the base now by gluing the folded sheets together using the diagram for a five pointed star. Do not use too much glue in the centre.

### Folding the Points of the Star

5. Make five square sheets and fold a single diagonal fold-line on each of them.  
Fold as shown. Turn the sheet over.

6. Fold the point (P) on the reverse side. After gluing the marked points turn the sheet back over.

7. Fold out both flaps as shown. Glue

### Assembling

8. Place the centre (C) of each point onto the centre of the base, with the centre fold-lines exactly on top of each other. Turn the transparency over to glue the concealed marked point on the reverse side.
